Thank you for your interest in Wide Eye Creative!

Please complete the short hypothetical assignment outlined on the next page, and return your results to erica@wideeyecreative.com

If you have any questions on the assignment, or if for whatever reason you do not feel like you have the tools at your disposal to complete this assignment, please reach out to erica@wideeyecreative.com and we'll do our best to come up with alternative arrangements.

OVERVIEW OF ASSIGNMENT

A long time ago, in a galaxy far, far away…

The battle for control over the galaxy has begun. A once promising young Jedi has fallen to the dark side of the Force and now has his sights on controlling the galaxy. He's preparing to win over the empire and needs to begin recruiting his army…

In this assignment, you've been asked to prepare a splash page for Darth Vader's campaign. The photoshop file linked below has been approved as the final design for the page. Other notes can also be found below.

Darth Vader splash page designs

PROJECT NOTES

NOTES
- The page should be built using Twitter Bootstrap. It should be optimized for desktop, tablet and mobile.
- Cross-browser compatible (Chrome, Firefox, Safari, and Internet Explorer).
- Retina-ready.
- The form does NOT need to capture data, but should be interactive.
- Montserrat from Google Fonts is used throughout.
- Social icons are created using Socialico font but the font does NOT need to be used in the final product.
- The "Learn more" button should, when clicked, display a short headline and three paragraph bio. Please use your best UI/UX instincts on how to effectively display that content.
- Please use any front-end flourishes (animations, hovers, etc) of your choosing

FINAL DELIVERABLES

- Please deliver all final files in a single Codepen or folder including all HTML/CSS/JS/image files.

BONUS

- While not required, if you'd like to build the splash page in PHP, it is optional but not required.
